EDA brings New Insight for Your Financial Freedom

Great News!!!
Eda Token ICO has finally launched!
CLICK here to buy through “LAUNCHPAD”

SECTION ONE: About Us

Vision

Bringing new insight for your financial freedom

Mission

- Provide a one-stop platform for a crypto user to access the crypto industry
- Simplify and make all crypto transactions user-friendly
- Increase rapid adoption of crypto as the currency of the emerging digital world
- Pioneer the digitalization process in Africa and across the globe
- Empower the user and his family financially.

Core Values

To fulfill its vision, EdaFace is committed to the following core values:

- Creativity
- Excellence
- Passion
- Integrity
- Transparency

SECTION TWO: Characteristics of EdaFace

EdaFace has four main characteristics:

(1). Beautiful design

EdaFace has a modern, beautiful interface that makes interaction on the platform quite friendly and welcoming.

(2). Decentralisation

EdaFace is a fully DECENTRALISED structure, meaning there is no central authority to censor your crypto trading. This is in keeping with the key feature of cryptos that eliminates centralization.

(3). Security

The EdaFace platform is safe, secure and reliable. It has one of the world's most sophisticated security systems.

(4). Simplicity

In addition, EdaFace is simple and easily navigable by anyone. As such, both newcomers and experienced users in the crypto industry will enjoy the ease of using cryptocurrencies on EdaFace.

V 1.00

SECTION THREE: Four Levels of EdaFace Structure

The structure of [EdaFace](#) is methodologically arranged into four (4) levels:

Level 1: Components

EdaFace has nine (9) Components.

Level 2: Compartments

Each Component is divided into Compartments. Some Components have just two Compartments while some others have up to four (4) or more Compartments.

Level 3: Divisions

Each Compartment is further divided into Divisions. There may be two or more Divisions for each Compartment.

Level 4: Anatomy

Each Division is organized in such a way that it is easy to navigate and offers speedy transactions. The structural organization of the Division is what is known as the Anatomy. Thus, the Anatomy is the framework of EdaFace.

Mnemonic

You can easily remember the EdaFace structure with this simple mnemonic: **CCDA**:

C = Components

C = Compartments

D = Divisions

A = Anatomy

SECTION FOUR: Brief Description of 9 Components of EdaFace

Component 1: Crypto Reflector

This is where you will see all the listed cryptocurrencies. Presently, about 13 000 cryptocurrencies are listed on EdaFace, and the number keeps increasing. In addition, you will see the trending cryptos in real time and be able to buy and sell cryptos via the Peer-to-Peer Platform.

Project developers can list their cryptos and/or advertise their crypto projects via EdaFace Component 1.

Component 2: Centralized Exchange Reflector

This is where you will see all the listed centralized exchanges (Cex) offering spot and futures (derivatives) trading services.

Presently, there are more than 400 Cex that are listed on EdaFace, and the number keeps increasing. In addition, this component has a Launchpad where you can view and join Ongoing, Upcoming, and Past Presales (ICO, IDO, IEO, STO, etc.).

Project developers can list their Cex and/or launch their Presales via EdaFace's Component 2.

Component 3: Decentralized Exchange Reflector

Here, you will see all the listed decentralized exchanges (Dex). Presently, there are more than 100 Dex that are listed on EdaFace, and the number keeps increasing. Here you can swap, stake, farm, and provide liquidity pairs to various pools.

In addition, Project developers can list their Dex and/or create pools for their coins and tokens. This is one of the beauties of EdaFace.

Component 4: Crypto Verification Centre

Another beautiful thing about EdaFace is that it does identify crypto scams via its Crypto Verification Centre, especially rug pulls, long before they occur. In other words, EdaFace helps all crypto lovers to avoid scams. This is the first of its kind in the crypto industry.

Also, you can track down any crypto on its blockchain via the Blockchain Ecosystem of EdaFace's Component 4. You can check how to use this essential feature on "How to Use EdaFace."

Component 5: NFT Marketplace

This is where all the three kinds of non-fungible tokens (NFTs) – fine arts, collectibles, and gaming NFTs – are displayed. Also, NFTs can be minted and traded here.

In addition, you can monitor and join the Metaverse world from here. Presently, there are more than 150 metaverse projects that are listed on EdaFace, and the number keeps increasing.

Component 6: Digital Literature Reflector

This is where digital literatures will be listed and traded. Digital literatures include digital books, digital songs, and digital plays, e.g., poetry, movies, dramas, etc. The interesting thing about this component is that anyone can list their digital literature and/or use EdaFace's services to produce his digital literature. Indeed, it is one of the uniqueness of EdaFace.

Component 7: EdaFace Digital Mall

This component is another unique feature of EdaFace. It is an e-commerce platform where you can buy and sell goods and services over the internet. Employers and employees can advertise their products and services via this component. Indeed, EdaFace Digital Mall connects the physical world to the digital world.

Component 8: EdaFace Academy

Education is key to success. EdaFace through its Academy offers the School of Cryptocurrencies, which will empower you with appropriate, skilled knowledge of the crypto industry that will enable you to accelerate your wealth via crypto investment.

In addition, this component offers news on current affairs in the crypto industry and in the Digital World in general. The news is constantly updating to keep you timely informed.

Component 9: Digital Clinic

This is an application that seeks to digitalize the healthcare system in Africa and beyond. It reduces patient waiting time in both private and public health facilities, ensures healthcare practitioners' accountability, monitors healthcare delivery efficiency, and discourages abuse of the healthcare system.

By these activities, the Digital Clinic of EDA helps to strengthen the healthcare system in Africa and beyond. It is indeed an innovative pioneer of healthcare delivery in this part of the world!

SECTION FIVE: Eda Token

Eda Token is the native utility token for EdaFace and the EDA ecosystem in general. The token is an ethical, community-driven cryptocurrency that rewards long-term holding with high-yield interest rates.

Name: Eda Token

Abbreviation: EDA

Blockchain: Binance Smartchain

Format: BEP20 Token

Decimals: 18

Total supply: 100 trillion

Characteristics of Eda Token

Eda Token has the following characteristics that make it very unique:

(a). Anti-dumping Transaction Fee

10% transaction fee to deter dumping will be applied for each sell. This 10% fee will be distributed via the following mechanisms that will ensure not only continuous price growth but also continuous increase in the number of tokens in the holders' wallets.

(b). Holder's Incentive Mechanisms

For holding Eda Token, you'll enjoy not only continuous increase in the number of the tokens in your wallets, but also increase in LP liquidity for your trading. This is because of the following mechanisms that have been built into Eda Token:

- Distribution to Holders: 2% of anti-dumping transaction fee
- Distribution to LP: 1% of anti-dumping transaction fee

- Referral Bonus for Referrer: 10% of referee's purchase
- Purchase Bonus for Buyer: 3% of every purchase

(c). Hyper-Deflationary Mechanisms

Eda Token is hyper-deflationary, which means the amount of tokens in circulation will progressively decrease over time. This will enhance continuous price growth. The hyper-deflationary mechanisms built into Eda Token are as follows:

- Continuous Token Burning: 4% of anti-dumping transaction fee
- Periodical Automatic BuyBack: 1% of anti-dumping transaction fee
- Marketing: 2% of anti-dumping transaction fee

(d). Anti-Whale Mechanisms

We encourage everyone to hold Eda Token for a long time in order to enjoy immense growth benefits but discourage massive dumping of the token. To ensure these, the following mechanisms are built into Eda Token:

- Maximum Holding per Wallet: 0.5% of Total Supply
- Maximum Sell per Transaction: 0.1% of Total Supply

(e). Stakability

Another benefit you get from Eda Token is that you can stake your tokens and enjoy a growth rate of 5% annual percentage yield (APY).

Utility Cases of Eda Token

Eda Token has multi-functional use cases.

The basic 13 use cases for EDA Token are as follows:

- (1). Payment for listing of cryptocurrencies on EdaFace
- (2). Payment for listing of Cex on EdaFace
- (3). Payment for listing of Dex on EdaFace
- (4). Payment for listing of digital literatures on EdaFace
- (5). Payment for digital literature production and transaction on EdaFace
- (6). Payment for minting and transactions of NFTs on EdaFace
- (7). Payment for using EdaFace Lanchpad
- (8). EDA Token will be involved in staking
- (9). EDA Token will be used for liquidity supply, e.g. yield farming
- (10). EDA Token will be the currency for EdaFace Digital Mall
- (11). Eda Token will be the currency for enrolment in EdaFace's School of Cryptocurrencies
- (12). EDA Token will be the currency for placement of advertisement on EdaFace
- (13). Eda Token will be the means of transaction on the Digital Clinic

From all these, you can see that Eda Token is highly profitable to hold in your wallets and for transactions.

SECTION SIX: ICO Details – How to Buy Eda Token

ICO means Initial Coin Offer. It is a crowdfunding method that a Crypto Project utilizes to advertise its young presence and raise funds for subsequent development. A good ICO provides you with an opportunity to acquire a token at a very cheap price.

In fact, many rich crypto whales make their stupendous wealth from good ICO like the Eda Token ICO.

[Great News!! ...Eda Token ICO has STARTED!!!](#)

The ICO price of Eda Token is ridiculously cheap.

ICO Phases

There are 30 Phases of the ICO of Eda Token. When one Phase finishes, the next phase then starts, and it will continue this way until the last phase is reached.

ICO Prices

The Price of Eda Token increases with each Phase.

First Phase ICO Price: 0.000 000 5 USD

Last Phase ICO Price: 0.000 0032 USD

The Minimum you can Buy = 0.05 BNB = 20 USD (at 400 USD per BNB)

The Maximum you can Buy = 50 BNB = 20 000 USD (at 400 USD per BNB)

Airdrops and Bonuses

To attract more people to participate in the ICO, there are free airdrops and bonuses.

The free airdrops will be of two kinds:

(a). Purchase Bonus:

For every purchase, the buyer will receive extra tokens at 3% of his total purchase.

(b). Referral Bonus:

In addition, when you refer your family members, friends, colleagues, or anyone you will receive 10% extra tokens for every purchase they make.

Fund Raising target

Softcap = 500 BNB = 200 000 USD (at 1BNB = 400 USD)

Hardcap = 36 076 BNB = 14 430 600 USD (at 1BNB = 400 USD)

Total token allocation for each ICO Phase is shown in [Table 1](#).

The target generated funds for each ICO Phase are shown in [Table 1](#).

Duration of the ICO

This will depend on when the 30 Phases of the ICO are all sold out. As the tempo of marketing increases, we expect more people to buy into the ICO, and this may shorten the duration of the ICO.

What happened after the ICO?

After the conclusion of the ICO, Eda Token will be listed in both centralized and decentralized exchanges.

Listed Exchanges: (coming soon after the ICO sales)

The Listing Price after the ICO

The minimum targeted listing price is 0.000005 USD. This will yield 900% profits for those who buy in the First Phase and 56.25% profit for those who buy during the Last Phase.

The 0.000005 USD is the minimum targeted listing price, but may ultimately be much higher.

For more details, see the *Eda Token whitepaper* at www.edaface.com
